

Sawn Joinery Redwood

Name: Redwood (*Pinus Sylvestris*)

Sourced from Scandinavia and Russia it can also be known as pine.

Colour: Pale yellowish brown to a reddish brown with lighter coloured sapwood.

Density: 510 kg/m³

Moisture movement: Medium

Working qualities: In general it works easily and well with both hand and machine tools. It can produce a smooth clean finish and can be glued, stained, varnished or painted well. Reasonably durable without treatment.

Uses: Interior joinery, furniture, structural use, decking, mouldings, flooring and cladding.
